

KANOKCHAT SAMANSUK

Recent IT Graduate | Software Developer | Full-Stack & AI Enthusiast

Recent IT graduate with hands-on project experience in web/mobile application development, backend APIs, databases, and AI-integrated applications. Completed an international internship in Japan (KOSEN), working on RAG-based AI workflows, backend APIs, Flutter mobile apps, and real-time features. Willing to learn, open to feedback, and ready to grow as a Software Developer in a real business environment.

TECHNICAL SKILLS

Languages : Python, SQL, JavaScript, Dart, PHP
Frontend : React, Next.js, HTML, CSS
Mobile : Flutter
Backend : FastAPI, Flask, Node.js, PHP REST API
Database : MySQL, Firebase Firestore
AI / ML : RAG, FAISS, TensorFlow Lite, PyTorch, Computer Vision, Ollama
Tools : Git, GitHub, Linux, Firebase Cloud Messaging
IoT : NodeMCU ESP8266, ESP32, Arduino

INTERNATIONAL EXPERIENCE

Research Assistant Intern — AI & AgriTech Project — Global Engineer Training Program

National Institute of Technology, Kagawa College (KOSEN), Japan | Sep – Dec 2025

- Built an AI agricultural knowledge assistant (Agri-Hacks) using RAG pipeline with FAISS, E5 embeddings, and Gemma2 via Ollama
- Developed backend APIs using FastAPI/Flask; integrated computer vision with PyTorch and BLIP-2
- Proposed and developed a strawberry cultivation AI support system as final research deliverable at KOSEN
- Stack: Next.js, FastAPI, Flask, PyTorch, Ollama (Gemma2), FAISS, BLIP-2

PROJECTS

JitDee — Mental Health Assessment Mobile App | Flutter · Firebase · TensorFlow Lite · ML Kit | 2025

- Developed a mental health mobile app with Flutter and Firebase, including PHQ-9 screening, assessment workflow, and role-based access control
- Implemented real-time appointment tracking and push notifications via Firebase Cloud Messaging
- Integrated on-device emotion detection using TensorFlow Lite + ML Kit with isolate-based processing

Social Network Mobile Application | Flutter · PHP REST API · MySQL | 2024

- Developed a social network mobile application with authentication, CRUD posts, real-time chat, and multimedia upload
- Designed RESTful API backend with PHP and MySQL

IoT Electrical Control System | NodeMCU ESP8266 · Firebase · Relay Modules | 2021

- Developed IoT-based home electrical control system with real-time device toggling via Firebase

EDUCATION

Rajamangala University of Technology Thanyaburi (RMUTT)

Bachelor's Degree in Information Technology and Digital Communication

GPA: 2.90 / 4.00 | Graduated April 5, 2026

LANGUAGES & SOFT SKILLS

Languages: Thai (Native) · English RT-TEP 4.0 (Basic to Intermediate) CEFR - B1

Soft Skills: Problem Solving · Critical Thinking · Adaptability · Teamwork · Responsibility
