

Kanokchat Samansuk

Junior Software Developer | Full-Stack & AI-Integrated Application Projects

Recent IT graduate with hands-on project experience in full-stack and mobile application development, backend APIs, databases, and AI-integrated applications. Experienced in Flutter, Firebase, FastAPI/Flask, MySQL, and REST API workflows through academic and international internship projects. Seeking a Junior Software Developer or Full-Stack Developer role to contribute to real-world software development and system integration.

EDUCATION

Rajamangala University of Technology Thanyaburi (RMUTT)
Bachelor's Degree in Information Technology and Digital Communication
(Graduated April 5, 2026)

LANGUAGES

Languages: Thai (Native)
English RT-TEP 4.0 (Intermediate)
CEFR - B1

SOFT SKILLS

Problem Solving
Critical Thinking
Adaptability
Teamwork
Responsibility

TECHNICAL SKILLS

Core Development : Python, JavaScript, Dart, PHP, SQL
Frontend / Mobile : React, Next.js, HTML, CSS, Flutter
Backend / API : FastAPI, Flask, Node.js, PHP REST API, RESTful API Integration
Database / Cloud : MySQL, Firebase Firestore, Firebase Cloud Messaging
Cloud Basics : AWS Academy Cloud Foundations, EC2, IAM, S3, VPC Basic
AI / ML Project Experience : RAG, FAISS, TensorFlow Lite, PyTorch, Computer Vision, Ollama
Tools : Git, GitHub, VS Code, Postman, Linux Basic

INTERNATIONAL EXPERIENCE

Research Assistant Intern — Global Engineer Training Program | Sep – Dec 2025
National Institute of Technology, Kagawa College (KOSEN), Japan

- Built an AI agricultural knowledge assistant (Agri-Hacks) using RAG pipeline with FAISS, E5 embeddings, and Gemma2 via Ollama
- Developed backend APIs using FastAPI/Flask; integrated computer vision with PyTorch and BLIP-2
- Proposed and developed a strawberry cultivation AI support system as final research deliverable at KOSEN
- Stack: Next.js, FastAPI, Flask, PyTorch, Ollama (Gemma2), FAISS, BLIP-2

PROJECTS

JitDee — Mental Health Assessment Mobile App | 2025
Flutter · Firebase · TensorFlow Lite · ML Kit

- Developed a mental health mobile app with Flutter and Firebase, including PHQ-9 screening, assessment workflow, and role-based access control
- Implemented real-time appointment tracking and push notifications via Firebase Cloud Messaging
- Integrated on-device emotion detection using TensorFlow Lite + ML Kit with isolate-based processing

Social Network Mobile Application | 2024
Flutter · PHP REST API · MySQL

- Developed a social network mobile application with authentication, CRUD posts, real-time chat, and multimedia upload
- Designed RESTful API backend with PHP and MySQL

IoT Electrical Control System | 2021
NodeMCU ESP8266 · Firebase · Relay Modules

- Developed IoT-based home electrical control system with real-time device toggling via Firebase
